### INSIDE THIS REPORT

Overview Pg. 1 Year in Review Pg. 2

Metrics Pg. 3 Looking Forward Pg. 4

*Staff and students at a recent POST TacMed course offered at the College of Western Idaho (CWI).*

***Idaho Peace Officer Standards and Training (POST) ensures "Professionalism through Training" of all Idaho law enforcement professionals including patrol officers; emergency communications officers; adult correction, detention, probation and parole officers; along with juvenile corrections, detention and probation officers. The POST Academy was established in 1970 and is now located in Meridian, Idaho. All Idaho peace officers are certified through POST, with 947 newly certified in 2024. There are approximately 6,600 certified peace officers in Idaho in all disciplines.***

***POST's mission is founded on the POST Council's Code of Ethics, ensuring those possessing POST certification adhere to the highest standards of personal and professional conduct. We are driven to be the standard by which all other professional organizations are judged and our vision remains as relevant and important as it was when we began in 1970: to ensure that Idaho law enforcement professionals model the highest level of integrity, safety, and service through excellence in standards and training.***

# THE RELENTLESS PURSUIT OF EXCELLENCE

## TO THE CITIZENS OF IDAHO

**POST Administrator**  
**Brad Johnson**

I am proud to present this annual report for 2024. POST overcame some significant challenges throughout the year, while continuing to pursue and achieve excellence in furtherance of our BHAG.

Following on the heels of our IADLEST accreditation with an Award of Excellence in 2022, the POST Academy is now regarded as representing the gold standard for academy training, both nationally and internationally. In February of this year, POST's expertise was requested as U.S. Soldiers from the Idaho Army National Guard's Charlie Company, 145th Brigade Support Battalion Medical Detachment, Airmen from the Idaho

Air National Guard's 124th Medical Group, active-duty Airmen from the 366th Medical Group, Mountain Home Air Force Base, and Navy Reserve counterparts from the Navy Operational Support Center conducted Tactical Combat Casualty Care during a mass casualty combat exercise, near Gowen Field.

Colin Yates, an Idaho Peace Officers Standards and Training instructor specializing in wounds and trauma for tactical medicine, created realistic wounds on 124th Fighter Wing's Student Flight role players acting as casualties for a more real-world training experience of Tactical Combat Casualty Care on the battlefield during the mass casualty combat exercise.

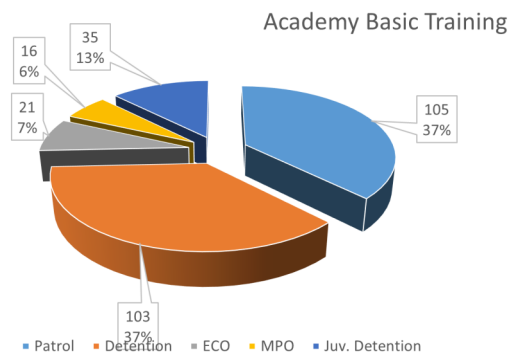

POST'S technology innovations continue, with the addition of the two, new state of the art trauma manikins, further enhancing our already robust TacMed training program. The previous Computer Lab (Classroom K) in building 8 was repurposed and now houses all of POST's simulators, including the new Virage driving simulators and our Ti Training Use of Force system.

Once again, POST has enjoyed a year of strong performance and achievement. We are sincerely grateful for your trust and support.

# BY THE NUMBERS

## Academy Training Bureau

A total of **322** students completed training during the conduct of **15** basic training sessions in 2024

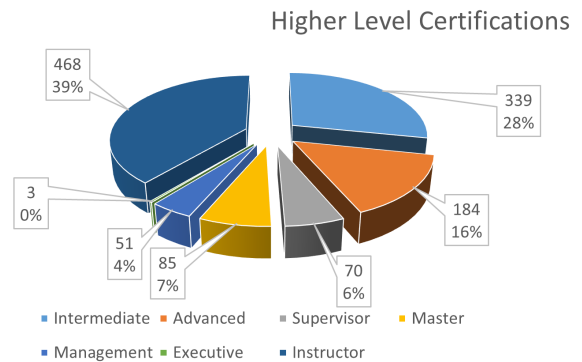

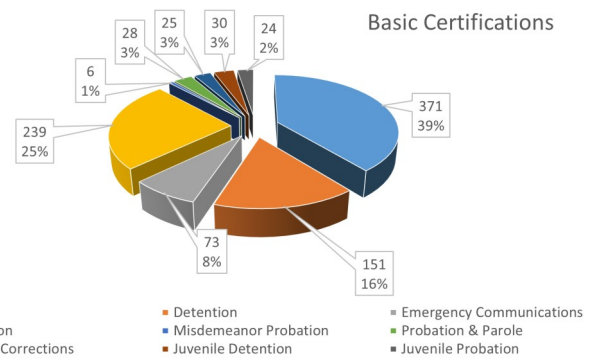

## Office of Professional Responsibility

Investigations	53
Revocations	43
