

Office of Community Oriented Policing Services- Active Shooter Response Training Program

Supervising the Response: Leadership in Active Attacker Incidents Workshop

The International Association of Directors of Law Enforcement Standards and Training, in conjunction with the COPS Office, is holding the next in the Active Shooter Response Training Program series, which is the 4-hour *Supervising the Response: Leadership in Active Attacker Incidents Workshop*.

Instructor: Terry A. Nichols retired as chief of police in Seguin, Texas, following more than 30 years in law enforcement. He also previously served as chief in Brownwood, Texas, and was a founding member and Assistant Director of Texas State University's ALERRT Center, where he helped secure more than \$40 million in grant funding and trained over 90,000 officers nationwide.

Terry is widely recognized for his contributions to law enforcement training, incident management, and emergency preparedness. He has served on national committees, worked with the Department of Justice and Department of Homeland Security, and is an experienced public speaker and author on active shooter response and officer safety. He is the immediate past Executive Director for the National Center for Integrated Emergency Response (NCIER) and Vice President of C3 Pathways.

Date and Time: **Wednesday, April 22nd**
7:45 am -11:45 am

Location: **Idaho State Police, District 1 - Training Room**
615 W. Wilbur Ave. #A
Coeur d'Alene, ID 83815

Purpose: The purpose of this lesson is to equip law enforcement supervisors with leadership strategies to effectively manage personnel safety, decision-making, and tactical coordination during active attacker incidents, with the goal of saving as many lives as possible.

Target Audience: Any law enforcement official who, by rank or circumstance, would be faced with having to take charge of an active shooter situation.

Learning Objectives: During this course, participants will receive information and instruction on how to do the following:

1. Using *inverted thinking* as a problem-solving technique, identify the worst possible outcomes of an active attacker event and list the various law enforcement responses that aid in preventing that outcome.
2. Review the commonalities of *active attacker* events, including location, victims, and weapons.
3. Identify the incident priorities of initial responding officers, whether line staff or supervisors, when responding to an active attacker event, and discuss how these are accomplished through an integrated response.
4. Using the Active Shooter Incident Management Checklist, identify key functions within the National Incident Management System Incident Command System.
5. Using case studies of active attacker events, analyze various responses, including those made by supervisors, and how they affected both positive and negative outcomes.

Registration: IADLEST Program Manager, Cdmr. (ret.) Daniel Howard at danhoward@iadlest.org, 609-284-6019 **OR**
Idaho State Police Lt. Allen Ashby at allen.ashby@isp.idaho.gov
