The T.A.P. Level 1 class emphasizes speed, precision, and enhanced problem-solving while reducing a team's operational footprint in a dynamic environment.

Bishop One's T.A.P. course challenges the default mindset of structure-based operations. Instead of confronting suspects in an environment where they have unknown advantages, we flip the script - drawing them into a controlled environment that we create, manipulate, and initiate action at our choosing. This is the essence of Trapdoor Tactics.

Trapdoor Tactics™ seamlessly merges the concurrent use of multiple strategies, which include vehicle containment techniques, open-area apprehensions, diversionary tactics, and environmental manipulation, into a highly effective mobile package to apprehend violent offenders.

Contact us if you are interested in attending this advanced training. Spots still available. Price \$900 per student.
