

OPTEMPO TRAINING GROUP
PRESENTS

COVERT PHYSICAL SURVEILLANCE

Successful surveillance requires far more than following a suspect—it demands planning, discipline, teamwork, and sound decision-making. This 4-day course provides the tactics, techniques, and procedures required to conduct effective covert surveillance operations in support of criminal investigations, warrant services, undercover operations, and other high-risk law enforcement missions.

Students learn proven surveillance methods through a combination of classroom instruction and realistic field exercises designed to build confidence and operational capability.

**PRACTICAL, OPERATIONAL,
AND FOCUSED ON REAL-
WORLD APPLICATION**
