Class Objective:

Not simply a legal update session. This class takes a dynamic and interactive approach to educating police canine handlers and supervisors on current criminal and civil laws which govern the performance of their duties. The class draws on the actual experiences of the instructor and those attending class to highlight the legal topics being covered. There is an emphasis on the connection between training and records and how officers fare in the courtroom. Students leave with a better appreciation of the links among their job performance, community acceptance and the development of the laws they operate under.
